Setting the Elite Standard in Construction Management

HICAPS CONSTRUCTION MANAGEMENT

Construction projects have time and cost sensitive objectives that must be viewed concurrently while addressing the unique challenges each project presents. HICAPS Construction Management recognizes this and is setting the elite standards that have become invaluable to Owners as they set their sights on meeting and/or exceeding corporate goals.

HICAPS Construction Management expertise is built on a foundation of employing a highly skilled and talented staff of Program/Project Managers, Professional Engineers, Senior Project Superintendents and Certified CPM planning/scheduling professionals. Through our centralized approach to Construction Management and General Contracting, HICAPS delivers the highest quality solutions without sacrifice. Utilizing a variety of methods and delivery systems; HICAPS continues the tradition of completing projects in the most time and cost effective manner.

Since 1985, HICAPS has completed an extensive and diverse portfolio of projects utilizing our expertise in Project Controls, Construction Management and General Contracting in serving private Owners, municipalities and the Federal Government. Both as a Construction Manager and General Contractor, HICAPS has the flexibility to address a variety of projects utilizing various contract formats such as single prime, multi-prime, CM at Risk, CM as Agent and Design Build. As your Construction Manager “as agent” or your builder, HICAPS possesses the skills and personnel to execute your project on time and within budget.
